PROFILE

Inventive MERN Stack Developer with expertise in building scalable web applications using modern technologies. Passionate about creating efficient, user-centric solutions and continuously learning emerging technologies. Proven ability to work collaboratively in fast-paced development environments while maintaining high code quality standards.

EDUCATION

National Institute of Technology - Kozhikode **July 2012 - Jan. 2018**

Bachelor of Technology - Mechanical Engineering

Kendriya Vidyalaya - Kochi **July 2012**

Higher Secondary

EXPERIENCE

Junior Software Developer **Feb. 2024 - Feb. 2026**

Gofreelab Technologies Kochi, Kerala

- Developed and deployed MedExpiry, a medicine management PWA using Next.js and React.js to help healthcare providers, pharmacists, and individuals track, manage, and replace expired medicines with real-time data updates.
- Enhanced user experience by implementing secure authentication system with JWT-based access for Login, Signup, and Password Recovery functionalities.
- Maintained high code quality through implementation of modern web technologies including JavaScript, Tailwind CSS, CSS3, Python Flask, Nameko, RabbitMQ, and MongoDB.
- Successfully deployed application using NodeShift with Nginx Web Server ensuring optimal performance and scalability.

CAREER DEVELOPMENT

Competitive Exam Preparation **Feb. 2018 - July 2023**

PSC, IBPS, SSC Examinations

- Dedicated intensive preparation for Public Service Commission (PSC), Institute of Banking Personnel Selection (IBPS), and Staff Selection Commission (SSC) examinations.

PROJECTS

Magella - Mini Project Management System | *Next.js, Node.js, MongoDB, Redis, Socket.io, Docker, Kubernetes* **Oct 2026**

- Built a real-time project management board with boards, lists and cards, where drag-and-drop changes sync instantly to every user on a shared board using Socket.io WebSockets, with live presence indicators.
- Designed a microservices backend in Node.js and Express (API gateway, auth, board and realtime services) on MongoDB, with JWT verified at the gateway and Redis for event messaging, rate limiting and presence across replicas.
- Containerized every service with Docker and deployed to Kubernetes with two realtime replicas behind an ingress; a 30-client load test confirms each event is delivered exactly once.
- Built a GitHub Actions CI/CD pipeline that builds the images, deploys to a temporary Kubernetes (kind) cluster, runs smoke and load tests, and publishes the images to GitHub Container Registry.

COURSES / CERTIFICATES

- **MERN Stack Development Course:** Completed from July 2023 to February 2024.
- **B.Tech Mechanical Engineering:** Graduated from National Institute of Technology, Calicut, January 2018.
- **Higher Secondary:** Completed from Kendriya Vidyalaya, Ernakulam, May 2012.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Frontend Technologies: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend Technologies: Node.js, Express.js, Python Flask, Apollo Server, GraphQL, Socket.io, Microservices, REST APIs

Databases: MongoDB, Redis

DevOps: Docker, Kubernetes, GitHub Actions (CI/CD), GitHub Container Registry

Tools/Technologies: JWT, RabbitMQ, Nameko, NodeShift, Nginx, Git, GitHub, Apollo Client

Soft Skills: Problem Solving, Team Collaboration, Communication

Languages: English (C2), Hindi (C1), Malayalam (C2)
